Beeswax

There is something particularly special about the honey-scented ivory of beeswax – it has been collected for thousands of years and is highly valued because it burns cleanly, with few drips and hardly any smoke. Beeswax Candles were exclusively reserved for the wealthy and the Church.

Here at Shearer Candles we use generations of expertise to produce long-burning pure beeswax candles in both tealight and pillar candle form.

Basic Pillars

Our range of basic pillar candles are an essential household product. These candles burn long and well like a basic, affordable candle should. They create a warm glow, a moody atmosphere and are ideal for emergency power cuts and energy saving. Available in unscented ivory wax with varying diameters and heights; A Shearer Candle essential.

Extrusion

High Quality, Long burn, Church Candles

The very latest technology in candle making. Crushed wax is forced, using intense pressure, through a heated die to produce a continuous length of candle. It is then cut into pre designated sizes. This process produces high volumes of candles with exceptional quality and long burn times. These candles burn with no wastage leaving a wax biscuit when consumed.

Church candles have always been at the heart of what we do at Shearer Candles. Classic, ivory and unscented, our range of extruded church candles come individually wrapped and can burn for up to 170 hours.
